

Oiles Group Information Security Policy

The Oiles Group recognizes the protection of information assets from various threats to be an important management issue. In order to continue to be a company that is trusted by our customers and by society as a whole, it has defined this Information Security Policy and strives to thoroughly manage and maintain information security.

1. Legal and regulatory compliance

We comply with the security requirements, etc., stipulated in laws and regulations, national governmental guidelines, internal regulations, and the terms of contracts with business partners that relate to information security.

2. Information security management structure

We have created an information security management structure led by management. We strive to protect information security and to make ongoing improvements in our operation of this structure.

3. Information security training

We provide information security training and conduct information security awareness-raising activities on an ongoing basis for our executives, employees, temporary employees, etc., so that they can appropriately manage information assets.

4. Information security measures

We implement appropriate security measures to prevent accidents and incidents related to information assets, such as unauthorized access, destruction, tampering, information leakage, or the loss of information assets.

5. Response to incidents and accidents

In the event of an incident or accident related to information security, we strive to minimize the impact of said incident or accident, to deal with it appropriately, and to prevent it from reoccurring in the future.
