

Oiles Group Environmental Policy

Oiles Group is deeply aware of the importance of preserving the global environment and therefore strives for reduction of the environmental load and consideration of water environment to achieve the realization and coexistence of a sustainable society through our business operations of bearings, seismic isolation and vibration control products, construction equipment and product lifecycles.

- 1. Environmental Protection** We are aware of the environmental impact of our business operations and strive to live in harmony with the natural and water environment and aim for continuous improvement and pollution prevention.
- 2. Effective Resource Utilization and Measurements Against Global Warming** As we realize that resources are limited, we take a proactive approach on recycling, resource, and energy saving and by controlling CO2 emitted from our business operations, strive to reduce the environmental load, and take consideration of the water environment.
- 3. Compliance with Environmental Regulations** We promote an environmental management system based on ISO14001, comply with environmental laws, regulations, and other requirements. Furthermore, we aim to thoroughly manage chemical substances and reduce substances that are environmentally hazardous.
- 4. Invention of Environment-friendly Products and Measurement for Recycling** We invent products that protect resources and reduce environmental impact by seeking environmental protection in the whole process from production and sales to disposal.
- 5. CSR Procurement (Green Procurement)** When procuring materials, our highest priority is to supply and purchase less-environmental load substances.
- 6. Thorough Dissemination to All Concerned Parties** We thoroughly disclose the environmental policy to all employees and business partners of Oiles Corporation Group, and work together as a group to develop activities that reduce environmental impact.
- 7. Promotion of Information Disclosure** We disclose information to our stakeholders, including locals, by publishing the environmental policy on the corporate website.
